

Brief PRD

Feature Name: SheLeads Innovation Hub – AI-Powered Mentorship and Career Platform

Company: IBM

PM in Training: Paris Coleman

Problem Solved

Black women in tech and entrepreneurship often lack direct access to advanced technology, mentorship, and funding pipelines. These barriers limit representation in STEM leadership and slow innovation.

Why It Matters to Users

SheLeads empowers Black women to learn, build, and lead using IBM's AI and cloud resources while gaining mentorship from industry leaders. Users gain career advancement, visibility, and funding support that directly addresses systemic gaps in tech leadership.

Key Success Metrics

- 500 active participants within first 12 months
- 75 % mentorship completion rate
- 30 % of graduates placed in STEM or leadership roles
- $\geq 4.5 / 5$ average satisfaction with mentorship and learning tools
- At least 20 startups founded or funded through Hub resources

User Story (As a User Format)

Mini Product Policy

Purpose

To ensure that all AI learning and mentorship recommendations in the SheLeads platform are accurate, inclusive, and bias-free — building trust and equity for participants.

Evaluation Criterion – Tone & Relevance Scale

Score	Definition	Action
5	Fully inclusive and empowering; relevant to user's goals	Production ready
4	Acceptable tone; minor refinement needed	Limited beta
3	Somewhat generic or misses user's context	Needs revision
< 3	Non-inclusive or biased language	Reject and retrain

Principles

- Human in the loop — mentors and users review AI-generated suggestions.
- Transparency — clearly label AI recommendations.
- Fairness — remove gender or cultural bias from training data.
- Privacy — user data used only for mentorship matching and learning analytics.
